JAS. RODGERS, P. M.

Too Poor. -Brother Moore of the Rural New Yorker, was sitting in his office one afternoon some years ago, when a farmer friend came in and said, "Friend Moore, I like your paper, but times are so hard I cannot pay for it."

"Is that so, friend Jones? I'm very sor-

ry to hear that you are so poor; and if you are so hard run I will give you my paper."
"O no! I can't take it as a gift."

"Well then let's see how we can fix it. You raise chickens I believe." 'Yes a few, but they don't bring any-

"Don't they? Neither does my paper bring anything hardly. Now I have a

bring anything hardly. Now I have a proposition to make you: I will continue your paper, and when you go home, you may select from your lot one hen, and call her mine. Take good care of her and bring me the proceeds, whether in eggs or chickens, and we will call it square."

"All right, brother Moore;" and that old fellow chuckled at what he thought was a capital bargain. He kept the contract strictly, and at the end of the year found that he had paid about four prices for his paper. He often tells the joke on himself and says he never had the face to say he was too poor to take a paper since that day.

CARE OF THE FEET.—Many are careless in the keeping of the feet. If they wash them once a week, they think they are doing well. They do not consider that the largest pores of the system are located in the bottom of the foot, and that the most offensive matter is discharged through the pores. They wear stockings from the beginning to the end of the week without change, which become completely soturated with offensive matter. Ill health is generated by such treatment of the feet. The pores are not repellants, but absorbents, and this fetid matter, to a greater or less extent, is taken back into the system. The feet should be washed every day with pure water only, as well as the arm-pits, from which an offensive odor is also emitted, unless daily ablution is practiced. Stockings should not be worn more than a day or two at a time. They may be worn one day and then aired and sunned, and worn another day if necessary.—Scientific American.

RATHER POWERFUL.—A certain professor was noted for having a certain set of illustrations, from which he could not well deviate without running the risk of a blunder. In illustrating the powerful effects of prussic acid, he was wont to inform the class that a drop placed on a dog's tongue was sufficient to kill him. On one occasion, when lecturing to his class, he

"Mr. Smith," addressing a young man whose chance for passing was very slender, "what can you say of prussic acid? Is it powerful or otherwise?" "It is rather powerful," said the student,

dubiously.

"Rather powerful!" said the professor, indignantly. "Put a drop on your tongue and it will kill a dog!"

The shout of laughter which followed, and Smith's confusion, revealed to the pro-

or that his illustration had served a double purpose.

Club Rates. For the purpose of placing the WEEKLY CHRONICLE in the reach of every one, we propose, in the future, to furnish it to clubs at the

following rates: 5 copies, one year..... And an extra copy for each club of twenty at

\$1.50 each. We will send our daily twelve months to any one sending us a club of forty subscribers for

one year at \$1.50 per copy.

This is a good time to commence canvassing. The holidays are coming and the year is closing. Everybody wants to make holiday presents, and we can conceive of nothing that would be more highly appreciated than a good live newspaper, paid for one year from the first of January 1871

Bill-Heads printed in the latest style at the CHRONICLE Job office. Subscribe for the ORRONICLE.

SPECIAL NOTICE.

Dr. SCHENCK advises Consumptives to go to Florida in Winter.

Having for he has histy-ter years deveted my whole time and extention to the study of lung diameter and compilers. I feel that I understand fully the course that county is to be pursued to restore a tolerably had case of the seared lung to healthy soundnes. The first and metimportiant etsy is for the patient to avoid dating coil, and the busy of all places a data continent for this purpose, in winter, is Florida, wall down in the State, where the temperature is require, and not subject to such variations as in more Ferthern latitudes. Flittle is a point I can require I are swrant parsons there shee human. Let wither I are swrant parsons there shee human. Let wither I are swrant parsons there shee human. Let be ship diseased, but who, under the healing influence of the climate and my mediciones, were getting well.

One hundred miles further down the river is a point which I would profer to Falatha, as the temperature is more even and the air dry and bracing. Mellourille and Enterprise are located there. I should give a decided proference to Mellouville. It is two miles from river or lake, and it seems almost impossible to take cod there. The tables in Florida might be better, and patients compine at its seems almost impossible to take cod there. The tables in Florida might be better, and patients compine a study of the consumptives in winter. My reasons for swying, so are that patients are less liable to take cold there than where there is a less went temperature, and it is not necessary to say that where a consumptive parson expects himself to frequent colds he is certain to die shortly. Therefore my adrite is, go well down into the State—out Other Professionally in New York, Botton, Baltimore and Philadelphia every peach, where I saw and examined on an average five human self to frequent colds he is certain to die shortly. Therefore my adrite is, go well down into the State, and the nearly recommended.

For internal parties of the state of the shore

sumption. Go where you will, you will be almost certain to find some poor consumptive who has been rescued from the very jaws of death by their use.

So far as the Mandrake Pills are conceyned, everybody should keep a supply of them on hand. They act on the liver better than calomel, and leave none of its burtful effects behind. In fact they are excellent in all cases where a purgative medicine is required. If you have partaken too freely of fruit and diarrhem ensues, a dose of the Mandrakes and they will relieve you in two hours. If you would obviate the effect of a change of water, or the too free indulgence in fruit, take one of the Mandrakes every night or every other night, and you may then drink water and eat watermelons, pears, apples, plums, peaches or ecom, without the risk of teing made sick by them. They will protect those who live in dampatmations against chills and fevers. Try them. They are perfectly harmless. They can do you good only. I have abandoned my professional visits to Boston and New York, but continue to see patients at my office, No. 15 N. SLX TH Street, Philadelphia, every Esturday, from 9 A. M. to 3 P. M. Those who wish a thorough examination with the Respirometer will be charged five dellars. The Respiremeter declares the exact condition of the hungs, and patients can readily learn whether they are curable or not. But I desire it distinctly understood that the value of my medicines depends entirely upon their being taken strictly according to directions.

In conclusion, I will say that when persons take my medicines and their systems are brought into a healthy condition thereby, they are not so liable to take cold, yet no one with diseased lungs can bear a sudden change of atmesphere without the liability of greater or less irritation of the bronchial tubes.

Full directions in all languages accompany my medicines, so explicit and clear that any one can use them withcut consulting me, and can be bought from any druggist.
